DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 6 and 8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 6, lines 1-2, the recitation "a computer to carry out the steps of .." is not disclosed in the specification. It is noted that the specification teaches a reproducing apparatus performs a method comprising the steps as being recited in the claim.

It is suggested that claim 6, lines 1-2, "An medium comprising ... steps of " needed to be changed to -- A medium recorded with a program executed by a computer for controlling a reproducing apparatus to perform a method comprising the steps of --.

Claim 8 recites a computer to transmit or record an MPEG transport stream is not disclosed in the specification. It is noted that the specification teaches a reproducing apparatus performs a method comprising the steps as being recited in the claim.

It is suggested that claim 8, lines 1-3 , "An medium for allowing --- executing the steps of " needed to be changed to -- A medium recorded with a program executed by a computer for controlling a reproducing apparatus to perform a method comprising the steps of ---.

3. Claims 7-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 7, it is not clear where the program is located and how the computer carries out the recited steps . It is suggested that claim 7,lines 1-2, should be changed to _ An information aggregate apparatus comprising a medium recorded with a program executed by a computer for performing a method comprising the steps of –

In claim 8, the preamble recites a computer to transmit or recorded --. However it is noted that body of the claim is reciting the steps of reproducing . Therefore it is not clear how the reproducing steps of are generated . Further the claim recite no location of the program therefore how the program is executed or processed is unclear.

Allowable Subject Matter

4. Claims 1-5 and 10 are allowed.

5. Claim 8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
